

RE: Correction to the Gracey Wind Farm Environmental Screening Report – Oct 16th, 2008

On September 3rd, 2007 Gengrowth issued its Notice of Completion for the Gracey Wind Farm and made its Environmental Screening Report available for public comment. This notice has been issued to provide a correction and update to the published information in Section 7.3 Agency/Stakeholder Consultation, which states the following.

“The Ministry’s Noise Unit reviewed the complete noise report (which is included in Appendix C.5). Based on the information provided, the Ministry considered the noise requirements in the report as complete and therefore concluded their technical review under the Environmental Screening Process.”

This statement is incorrect.

On August 20th, 2008, prior to the publication of the Notice of Commencement for the Gracey Wind Farm, Gengrowth submitted our noise report to the Ministry of Environment’s Noise Division for technical evaluation. Gengrowth has not yet received comments on the August 20th, 2008 version of the Gracey Wind Farm Noise Study from the MOE Noise Division and must still satisfy this requirement to complete the Environmental Screening Process.

We apologize for any confusion this mistake has caused and we anticipate that this matter will be resolved shortly.
